

Senteo interactive response system

Gain immediate insight into learning

The Senteo™ interactive response system with Senteo assessment software 2.0 can give you instant insight into how well students understand your lessons. This versatile teaching tool combines wireless remotes, a receiver and powerful software to help you conduct assessments and report, track and analyze the results. Students use the remotes to provide instant responses to questions and quizzes, and the software automatically tallies, summarizes and files the results.

Create engaging questions and quizzes

You can access Senteo software 2.0 directly from a tab in SMART Notebook software. This seamless integration lets you easily insert questions into your lessons. It also allows you to add interactive and multimedia content to tests and quizzes, making them more engaging. Import questions from SMART's education solutions website, Microsoft® applications and other popular file formats. Or, create your own assessments by choosing from a variety of question types. Simple prompts and links guide you every step of the way, making it easy to perform any task.

Manage and analyze assessment

A comprehensive gradebook built into Senteo software 2.0 allows you to organize and categorize students' grades and test scores. Assessment results are automatically added to the gradebook and saved in a single file. All assessment data can be viewed and managed through Senteo Teacher. Use this management tool to create class lists, conduct assessments and view reports, all from one location. Reports can be as simple or as detailed as you need – from personalized reports on individual students to high-level comparisons of student results. By tagging questions with keywords, you can track and analyze assessment data in greater detail.

- A** Insert quizzes into SMART Notebook software
- B** Manage data with Senteo Teacher
- C** Access the built-in gradebook

Features

- 1** Power button
- 2** Descriptive icons indicating battery power and network status
- 3** Student question button
- 4** Question scroll buttons
- 5** Yes/no, true/false answer button
- 6** Multiple choice response buttons
- 7** Control buttons for fractions, decimals and positive and negative numbers

Senteo assessment software 2.0

- **SMART Notebook software integration** – Create dynamic questions and assessments that feature images and other multimedia content. SMART Notebook software offers more than 5,000 pieces of graphic-rich digital content.
- **Senteo Teacher** – Access, view and manage all assessment data in one location. This powerful tool allows you to create class lists, and set up, conduct and manage tests and quizzes. You can also monitor each student's progress during a test and instantly view their results.
- **Comprehensive gradebook** – Use the built-in gradebook to track performance reports that are automatically collected and saved to one easily accessed file. You can also create reports that show grades for the entire school year.
- **Content pages** – Insert content pages between questions to enhance any quiz, test or exam
- **Intuitive on-screen links** – Proceed easily through every task using helpful links and simple prompts that guide you step by step.
- **Multiple assessment options** – Compile tests for formative and summative assessment, prepare quizzes or exams in advance and ask spontaneous questions to gauge students' comprehension at any point during a lesson.
- **Question variety** – Ask different types of questions, including true or false, yes or no, multiple choice, numeric response and multiple answer.
- **Import and export content** – Use questions from third-party question banks. The Senteo interactive response system is fully compatible with Microsoft applications and other commonly used file formats.
- **Flexible marking** – Create assessments that assign different point values to individual questions, and adjust student scores in the gradebook.
- **Tagging** – Tag student names and assessment questions with keywords to track specific characteristics you can use to measure and analyze student performance in greater detail.
- **Multiple print options** – Print quizzes as handouts so students can complete them at their own pace, or add comments to completed tests that can be used as study guides.

Content and resources

- **Senteo question sets** – Access thousands of Senteo question sets, all correlated to curriculum standards. The sets are free and can be found on SMART's education solutions website and other third-party websites.

Hardware

- The Senteo interactive response system includes a receiver, remotes and software. The system is available in 24- or 32-unit packages, and is compatible with both Microsoft Windows® and Mac OS operating systems. For full system requirements, please visit www.smarttech.com/senteo.

Remotes

- **Radio frequency technology** – The system provides a reliable and convenient wireless connection between the student remotes and receiver. You don't need a line of sight. The remote has a range of up to 100 feet (30 m).
- **Large LCD screen** – The screen displays three lines of text. Students can see if their responses have been sent and review the battery power and network connection.
- **Ergonomic design** – The handheld remote is easy-to-use and comfortable for young students to hold.
- **Extended battery life** – Each remote uses two AA batteries, which are long-lasting and easy to replace.

Receiver

- **Easy connection and installation** – The receiver hooks up easily through a USB connection and can be either mounted on a wall or placed on a desk. No extra power supply is required.
- **Convenient maintenance features** – LED lights indicate power status and whether information has been sent or received.
